How your pack was made

Making inferences and citing text evidence (fiction and nonfiction) · grade 7 english / reading · for Mr. Haverford (made-up sample) · 2026-11-05

> The maker wrote 26 questions (counting each version). 4 separate agents that didn't write them checked the work over 3 rounds. 66 problems needed a fix: 17 fixed, 49 not fixed yet and left for you. 20 more were looked at and kept on purpose. 13 are judgment calls left for you to decide.

6
agents involved
17 logged steps. The agent that writes never checks its own work.

3
rounds of checks
10 check runs by fresh agents, plus 3 Wilco runs; each round rechecks the fixes.

20
questions checked
26 in the pack, each version counted.

66 → 17 fixed
catches found and fixed
20 kept on purpose · 13 left for you to decide · 49 not fixed yet

44.7
minutes of agent work
Logged from — to —; 3 steps not timed.

$12.76
AI cost of this pack
10,125,326 tokens, added up from the log.

Preview: not approved yet. Nothing is released until the teacher signs off in REVIEW.html.

In this pack

READING CHECK: "BISCUIT" AND "THE REEDS OF THE NORTH LAGOON" (versions A, B) · RACE CHECKLIST

Check it before students see it. Made with AI from the source material you provided, then checked by separate AI agents. Please review everything before it goes in front of students.

PREVIEW — not approved for use

Every step, in order

The reporter logged each step as it happened: who did it, what they did, how long it took and what it cost. A dash means the step wasn't timed.

Time	Who	What	Minutes	Tokens	Cost
—	🧭 Order lead	Receive order and owner's decision "try c"; commit maker.md v6; rebuild maker inputs (onboarding.json from the order's records, teacher's go, open FIX list). Not measured.	—	—	—
—	🧭 Order lead	Runner test	0.1	—	$0.11
—	📝 Maker	Round 1: kept the story (trimmed 374 to 350 words); new invented article "Trouble in the East Valley" (316 words); 10 multiple choice + 2 short + RACE per version. Cap $4.10	10.1	1,661,588	$2.42
17:27	🤖 Wilco	Scripts: keys, test-wise bots, no-passage bots. All three pass (recorded as round 1; the pack shows the later article title). Not measured	—	—	—
—	🔎 Fact checker	Round 1: invented article checked against itself only. 14 flagged: 10 FIX, 4 JUDGMENT	2.8	339,109	$0.77
—	🙈 No-passage probe (ELA)	Round 1, version A: 7 of 10 right without the passage. Fail	0.8	191,504	$0.32
—	🙈 No-passage probe (ELA)	Round 1, version B: 9 of 10 right without the passage. Fail	1.0	247,971	$0.37
—	📝 Maker	Round 2 redesign: article rewritten as "The Reeds of the North Lagoon" (322 words) to break the familiar cause chain. Cap $3.50	10.8	3,594,658	$2.98
—	🔎 Fact checker	Round 2 on the rewritten article: 7 new FIX, 2 new JUDGMENT; the round 1 items were confirmed gone with the old article	2.9	458,791	$0.87
—	🙈 No-passage probe (ELA)	Round 2, version A: 8 of 10 right without the passage. Fail	0.9	244,714	$0.34
—	🙈 No-passage probe (ELA)	Round 2, version B: 6 of 10 right without the passage. Fail	0.7	190,513	$0.30
—	📝 Maker	Round 3 FIX (last round): answer pairs made symmetric (A q1, q2, q6, q7, q8, q11, q12; B q2, q8, q12 reworked); fact FIX applied. Cap $2.75	7.3	1,598,198	$1.88
—	🙈 No-passage probe (ELA)	Round 3, version A, whole version, final: 9 of 10 right without the passage. Fail	0.9	192,688	$0.33
—	🙈 No-passage probe (ELA)	Round 3, version B, whole version, final: 5 of 10 right without the passage. Fail	0.9	295,263	$0.37
—	🔎 Fact checker	Round 3 recheck: earlier FIX confirmed fixed; 2 new minor FIX, 2 JUDGMENT	1.8	476,612	$0.68

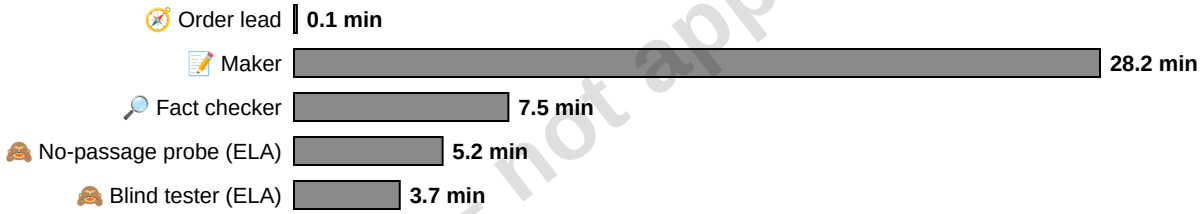

PREVIEW — not approved for use

—	🙈 Blind tester (ELA)	Round 3 keyless solve of both versions: 20 of 20 keys confirmed; 7 FIX, 4 JUDGMENT, 2 KEEP	3.7	633,717	$1.02
—	🧭 Order lead	Score probes, close the order: gate still open after 3 rounds; records filed under attempts/try-c. No preview sent to the teacher, no approval. Not measured	—	—	—
	17 steps	**Total**	**44.7**	**10,125,326**	**$12.76**

Where the time went

Not timed: 🤖 Wilco.

What your agents learned from your examples

- First line: Name ___ Class ____ Date ____.
- Title in ALL CAPS with (Form A) or (Form B).
- Plain text, no boxes; long underscore answer lines.
- Questions 1. 2.; choices A.–D. one per line; one-word choices lowercase.
- Part A and Part B each numbered; evidence choices are short quotes ending in [paragraph].
- Short, plain directions; constructed response on the back with RACE spelled out.
- About grade 7 reading level; short sentences; American spelling.

PREVIEW — not approved for use

What the checkers caught, and how it was fixed

99 findings in all. 66 problems needed a fix: 17 fixed, 49 not fixed yet and left for you. 20 more were looked at and kept on purpose. 13 are judgment calls left for you to decide. Wrong choices and wording were fixed; answer keys were never changed just to pass a check.

Not fixed yet (49)

READING CHECK: "BISCUIT" AND "TROUBLE IN THE EAST VALLEY" A q7 · round 1 · 🙈 No-passage probe (ELA) — **Not fixed: for you**

BEFORE · WHAT THE CHECKER CAUGHT	NOT FIXED YET
Right without the passage at confidence 4; cue (topic): dying trees leave bare slopes; erosion silts streams and fish decline - general ecology	Not fixed yet: please look at it before you approve.

READING CHECK: "BISCUIT" AND "TROUBLE IN THE EAST VALLEY" A q8 · round 1 · 🙈 No-passage probe (ELA) — **Not fixed: for you**

BEFORE · WHAT THE CHECKER CAUGHT	NOT FIXED YET
Right without the passage at confidence 4; cue (topic): ambrels eat grubs (q8 D grub shells, q11 C); trophic cascade: first effect is more grubs, tree damage comes later	Not fixed yet: please look at it before you approve.

READING CHECK: "BISCUIT" AND "TROUBLE IN THE EAST VALLEY" A q9 · round 1 · 🙈 No-passage probe (ELA) — **Not fixed: for you**

BEFORE · WHAT THE CHECKER CAUGHT	NOT FIXED YET
Right without the passage at confidence 5; cue (item): q10 choice A ('same dry summers, and its trees stayed green') is a control showing weather is not the cause	Not fixed yet: please look at it before you approve.

READING CHECK: "BISCUIT" AND "TROUBLE IN THE EAST VALLEY" A q10 · round 1 · 🙈 No-passage probe (ELA) — **Not fixed: for you**

BEFORE · WHAT THE CHECKER CAUGHT	NOT FIXED YET
Right without the passage at confidence 5; cue (item): the 'But ... same dry summers' sentence from paragraph 3 pairs directly with q9 D	Not fixed yet: please look at it before you approve.

PREVIEW — not approved for use

READING CHECK: "BISCUIT" AND "TROUBLE IN THE EAST VALLEY" A q11 · round 1 · 🙈 No-passage probe (ELA)

Not fixed: for you

BEFORE · WHAT THE CHECKER CAUGHT	NOT FIXED YET
Right without the passage at confidence 4; cue (item): q8 D (grub shells in droppings) and q8 B (grubs underground) show ambrels hunt grubs below ground	Not fixed yet: please look at it before you approve.

READING CHECK: "BISCUIT" AND "TROUBLE IN THE EAST VALLEY" B q3 · round 1 · 🙈 No-passage probe (ELA)

Not fixed: for you

BEFORE · WHAT THE CHECKER CAUGHT	NOT FIXED YET
Right without the passage at confidence 4; cue (item): q4 choice C, "She stayed until he finished the last problem" [6], shows Biscuit stayed by him during homework, which fits only A. B is the distractor built on the 'used to teach math' quote.	Not fixed yet: please look at it before you approve.

READING CHECK: "BISCUIT" AND "TROUBLE IN THE EAST VALLEY" B q4 · round 1 · 🙈 No-passage probe (ELA)

Not fixed: for you

BEFORE · WHAT THE CHECKER CAUGHT	NOT FIXED YET
Right without the passage at confidence 4; cue (item): Matches the A answer to q3; it is the only choice about Biscuit staying near him while he works.	Not fixed yet: please look at it before you approve.

READING CHECK: "BISCUIT" AND "TROUBLE IN THE EAST VALLEY" B q6 · round 1 · 🙈 No-passage probe (ELA)

Not fixed: for you

BEFORE · WHAT THE CHECKER CAUGHT	NOT FIXED YET
Right without the passage at confidence 4; cue (item): Beetles plus grubs in the soil; q10 D mentions 'grub shells' in paragraph 4. Eggshells and gulls belong to the egg plot, not the soil.	Not fixed yet: please look at it before you approve.

READING CHECK: "BISCUIT" AND "TROUBLE IN THE EAST VALLEY" B q7 · round 1 · 🙈 No-passage probe (ELA)

Not fixed: for you

BEFORE · WHAT THE CHECKER CAUGHT	NOT FIXED YET
Right without the passage at confidence 4; cue (item): q10 B quotes paragraph 6: 'young hesk trees grow on the East Valley's lower slopes.' Roots holding soil is also general erosion knowledge (topic).	Not fixed yet: please look at it before you approve.

PREVIEW — not approved for use

READING CHECK: "BISCUIT" AND "TROUBLE IN THE EAST VALLEY" B q9 · round 1 · 🙈 No-passage probe (ELA)

Not fixed: for you

BEFORE · WHAT THE CHECKER CAUGHT

Right without the passage at confidence 4; cue (item): q10 D (ambrel droppings full of grub shells) and the clearly built-up arc (removed lizard leads to grubs, then dying trees) point to the ambrels protecting the trees. The other choices are off-message.

NOT FIXED YET

Not fixed yet: please look at it before you approve.

READING CHECK: "BISCUIT" AND "TROUBLE IN THE EAST VALLEY" B q11 · round 1 · 🙈 No-passage probe (ELA)

Not fixed: for you

BEFORE · WHAT THE CHECKER CAUGHT

Right without the passage at confidence 4; cue (sounds): 'Why mention X' in an ecology article usually means showing the human cost. Muddy streams (q7) point to the fish being hurt, which matches B. A is the near rival.

NOT FIXED YET

Not fixed yet: please look at it before you approve.

READING CHECK: "BISCUIT" AND "THE REEDS OF THE NORTH LAGOON" A q8 · round 2 · 🙈 No-passage probe (ELA)

Not fixed: for you

BEFORE · WHAT THE CHECKER CAUGHT

Right without the passage at confidence 4; cue (item): q7 and q11 show the drells and their nesting are what brought the reeds back, and q10 C shows the shoots were eaten every summer (snails). B is the only choice that links reeds, drells and that chain.

NOT FIXED YET

Not fixed yet: please look at it before you approve.

READING CHECK: "BISCUIT" AND "THE REEDS OF THE NORTH LAGOON" A q9 · round 2 · 🙈 No-passage probe (ELA)

Not fixed: for you

BEFORE · WHAT THE CHECKER CAUGHT

Right without the passage at confidence 4; cue (item): q10 C (shoots came up each spring and were gone each summer) shows something besides the storm was at work, and the stem's 'expected' signals a surprise.

NOT FIXED YET

Not fixed yet: please look at it before you approve.

Right without the passage at confidence 4; cue (item): only quote about homework or a page; matches q3 A	Not fixed yet: please look at it before you approve.

READING CHECK: "BISCUIT" AND "THE REEDS OF THE NORTH LAGOON" A q9 · round 3 · 🙈 No-passage probe (ELA)

Not fixed: for you

BEFORE · WHAT THE CHECKER CAUGHT	NOT FIXED YET
Right without the passage at confidence 4; cue (item): q10 choice D 'The snails ate those too' and q11's shoots eaten at night point to snails eating the planted reeds.	Not fixed yet: please look at it before you approve.

READING CHECK: "BISCUIT" AND "THE REEDS OF THE NORTH LAGOON" A q10 · round 3 · 🙈 No-passage probe (ELA)

Not fixed: for you

BEFORE · WHAT THE CHECKER CAUGHT	NOT FIXED YET
Right without the passage at confidence 4; cue (item): Only quote matching the snail chain other items describe; 'too' fits planted reeds.	Not fixed yet: please look at it before you approve.

PREVIEW — not approved for use

READING CHECK: "BISCUIT" AND "THE REEDS OF THE NORTH LAGOON" A q11 · round 3 · 🙈 No-passage probe (ELA) — **Not fixed: for you**

BEFORE · WHAT THE CHECKER CAUGHT	NOT FIXED YET
Right without the passage at confidence 4; cue (item): Snails eat shoots (q10 D, q9 A); a night trip reveals what was eating the shoots.	Not fixed yet: please look at it before you approve.

READING CHECK: "BISCUIT" AND "THE REEDS OF THE NORTH LAGOON" B q9 · round 3 · 🙈 No-passage probe (ELA) — **Not fixed: for you**

BEFORE · WHAT THE CHECKER CAUGHT	NOT FIXED YET
Right without the passage at confidence 4; cue (item): q10 A says 'no one had ever seen one do it' = only a guess; q10 C (catch didn't drop) backs it too.	Not fixed yet: please look at it before you approve.

READING CHECK: "BISCUIT" AND "THE REEDS OF THE NORTH LAGOON" B q10 · round 3 · 🙈 No-passage probe (ELA) — **Not fixed: for you**

BEFORE · WHAT THE CHECKER CAUGHT	NOT FIXED YET
Right without the passage at confidence 4; cue (item): Only quote that directly says the belief had no evidence; B contradicts it, D is about chasing.	Not fixed yet: please look at it before you approve.

version A (whole) · round 3 · 🙈 Blind tester (ELA) — **Not fixed: for you**

BEFORE · WHAT THE CHECKER CAUGHT	NOT FIXED YET
No-passage solve: 10 of 10 mc right (4 at confidence 4-5), well over the 40% line. Main leaks: the A q9/A q10 pair, A q8 and A q11 all lean on the same snails-ate-the-shoots chain that the other items' choices spell out; A q1 is the story type's default (kid sets out to prove himself).	Not fixed yet: please look at it before you approve.

version B (whole) · round 3 · 🙈 Blind tester (ELA) — **Not fixed: for you**

BEFORE · WHAT THE CHECKER CAUGHT	NOT FIXED YET
No-passage solve: 7 of 10 mc right (3 at confidence 4-5), over the 40% line. Leaks: B q9/B q10 paraphrase pair, B q8 (taught by a B q7 wrong choice), and B q3/B q4 point at each other. B q1, B q6 and B q7 held up.	Not fixed yet: please look at it before you approve.

PREVIEW — not approved for use

READING CHECK: "BISCUIT" AND "THE REEDS OF THE NORTH LAGOON" A q9 · round 3 · 🙈 Blind tester (ELA)

Not fixed: for you

BEFORE · WHAT THE CHECKER CAUGHT	NOT FIXED YET
Part A key and Part B key are the only choices about snails, and Part B's key restates Part A's key, so the pair answers itself without the passage. Direction: give Part A a second wrong choice about snails or eaten shoots that misreads [5] (e.g. a timing or cause slip), and give Part B a real on-topic quote that supports that wrong choice, not an off-topic line like the fishermen one (A q10 C).	Not fixed yet: please look at it before you approve.

READING CHECK: "BISCUIT" AND "THE REEDS OF THE NORTH LAGOON" A q8 · round 3 · 🙈 Blind tester (ELA)

Not fixed: for you

BEFORE · WHAT THE CHECKER CAUGHT	NOT FIXED YET
Right at confidence 4 with no passage: A q9's key (snails went uneaten) plus the salt line in A q10 tell a test-taker the cause is missing birds. D (fish that ate snails) is a made-up idea no reader would choose. Direction: replace D with a misreading the passage supports, such as one built on the fishermen being glad the drells left [2]. Facts to check: the passage never says the fishermen drove them off.	Not fixed yet: please look at it before you approve.

READING CHECK: "BISCUIT" AND "THE REEDS OF THE NORTH LAGOON" A q11 · round 3 · 🙈 Blind tester (ELA)

Not fixed: for you

BEFORE · WHAT THE CHECKER CAUGHT	NOT FIXED YET
Right at confidence 4 with no passage: every other A item about the article is about snails eating shoots, so B is the obvious pick. Direction: make one wrong choice another real use of the night trip in [4], such as seeing what the snails were doing to the roots versus how many there were, so the reader has to check [4].	Not fixed yet: please look at it before you approve.

PREVIEW — not approved for use

READING CHECK: "BISCUIT" AND "THE REEDS OF THE NORTH LAGOON" B q9 · round 3 · 🙈 Blind tester (ELA)

Not fixed: for you

BEFORE · WHAT THE CHECKER CAUGHT

Part B key ('no one had ever seen one do it') is a near-paraphrase of Part A key D, so the pair gives itself away; also B q9 is close to literal ([2] says it outright) and too easy for L3. Direction: make Part A ask what the [7] catch data suggest about the belief (needs [2]+[7]), and give Part B a second real quote that fits a wrong choice.

NOT FIXED YET

Not fixed yet: please look at it before you approve.

READING CHECK: "BISCUIT" AND "THE REEDS OF THE NORTH LAGOON" B q8 · round 3 · 🙈 Blind tester (ELA)

Not fixed: for you

BEFORE · WHAT THE CHECKER CAUGHT

B q7's wrong choice B (drells kept the snails off the young shoots) teaches the article's mechanism, and with 'first drells' in the stem, B (two pairs too few) is guessable at confidence 4. Direction: reword B q7 B to another misreading (not the drell-snail link), and give B q8 a second wrong choice tied to the birds, e.g. the drells nesting at first but not feeding nearby. Facts to check: the article doesn't say where the drells fed.

NOT FIXED YET

Not fixed yet: please look at it before you approve.

READING CHECK: "BISCUIT" AND "THE REEDS OF THE NORTH LAGOON" B q12 · round 3 · 🙈 Blind tester (ELA)

Not fixed: for you

BEFORE · WHAT THE CHECKER CAUGHT

Can get more than half credit with no passage: 'in use' is the everyday sense, and B q8's stem prints a detail that shows it (the first drells moved onto the platforms). Only the paragraph number is missing. Direction: take the drells' move-in detail out of B q8's stem (e.g. ask about the five slow summers instead), or pick a phrase in [6] whose meaning in context isn't the everyday one.

NOT FIXED YET

Not fixed yet: please look at it before you approve.

PREVIEW — not approved for use

READING CHECK: "BISCUIT" AND "THE REEDS OF THE NORTH LAGOON" B q3 · round 3 · 🙈 Blind tester (ELA) — Not fixed: for you

BEFORE · WHAT THE CHECKER CAUGHT

Listed L3 but it is one step and close to literal ([6] she sat by him while he worked, so he offers to bring homework). Much easier than A q3, which needs three clues; B is easier than A at the same position. B q3/B q4 also point at each other in the no-passage solve. Direction: make B q3 an inference that needs two paragraphs (e.g. what Kiran learned about why Biscuit came to him, combining [2]/[4] with [5]-[6]).

NOT FIXED YET

Not fixed yet: please look at it before you approve.

q2 why.A · round 1 · 🔎 Fact checker — Not fixed: for you

BEFORE · WHAT THE CHECKER CAUGHT

'The notes only say she is shy [1]' is false. Mrs. Abara SAYS aloud that Biscuit is shy; the page of notes says 'Dev will come Thursday to water the plants.' Suggested direction: 'Mrs. Abara only tells him Biscuit is shy [1], and her note is about Dev's Thursday visit; nothing tells him to leave her alone.' Sweep: q2 why.B, q3 why.A and q4 why.A use 'note' correctly; no other place.

NOT FIXED YET

Not fixed yet: please look at it before you approve.

q3 choices.B[1] ('Mrs. Abara used to teach and could help him with math.') · round 1 · 🔎 Fact checker — Not fixed: for you

BEFORE · WHAT THE CHECKER CAUGHT

This wrong choice is half true and the order of [7] supports it: she glances at his notebook and says 'I used to teach math, you know,' and Kiran then offers to bring his homework. The why's 'he never asks her for help' does not rule it out. Replace with a choice the passage contradicts or plainly does not support (direction: something tied to Dev or the plants, e.g. 'He wants to help Dev water the plants.'; facts to check: [7] only shows Dev watering, Kiran never offers to help). Sweep: q4 choices.B[0] '"I used to teach math, you know." [7]' and q4 why.B 'backs "Mrs. Abara will help him"' must change with it.

NOT FIXED YET

Not fixed yet: please look at it before you approve.

PREVIEW — not approved for use

q8 answer B / choices.B[0] ('They kept going missing, since gulls were the real thieves.') · round 1 · 🔎 Fact checker — Not fixed: for you

BEFORE · WHAT THE CHECKER CAUGHT	NOT FIXED YET
Widens the passage: [4] says the eggs had 'most likely' been taken by gulls; the key makes it certain. Suggested: 'They kept going missing, since gulls were most likely taking them.' Sweep: q8 why.A and why.B, q6 why.B, q7 why.A keep the 'most likely' / 'likely' hedge; no other place.	Not fixed yet: please look at it before you approve.

q8 why.B · round 1 · 🔎 Fact checker — Not fixed: for you

BEFORE · WHAT THE CHECKER CAUGHT	NOT FIXED YET
Two widenings. (1) 'ambrels crossed the ridge only when islanders carried them in 1985 [6], not on their own': the article never says ambrels could not cross on their own; it only describes the 1985 move. Direction: 'the only crossing the article describes is the 1985 move by islanders [6].' (2) 'The farmers expected the losses to stop [2]': [2] says they blamed the ambrels and paid for them to be caught; 'expected' is an inference. Direction: 'The farmers blamed the ambrels [2], but they had the wrong animal.'	Not fixed yet: please look at it before you approve.

q9 why.B · round 1 · 🔎 Fact checker — Not fixed: for you

BEFORE · WHAT THE CHECKER CAUGHT	NOT FIXED YET
'young trees grow back after ambrels return, not by hand planting [6]': [6] never says how the young trees came to grow, so 'not by hand planting' goes beyond it. Direction: 'the article never mentions planting trees by hand [6].'	Not fixed yet: please look at it before you approve.

q9 choices.B[0] ('to point out that Marrow faulted the farmers for the loss') · round 1 · 🔎 Fact checker — Not fixed: for you

BEFORE · WHAT THE CHECKER CAUGHT	NOT FIXED YET
Arguably true: Marrow's line that the island 'paid its children to get rid of its gardeners' [7] is a criticism of what the islanders did, and in [2] it is the farmers ('they') who paid the children. The why's 'the article never shows her blaming farmers' does not hold up against the quote's tone. Replace with a choice the passage contradicts (direction: 'to point out that Marrow blamed the gulls for the dying trees'; facts to check: [4] links gulls only to the eggs).	Not fixed yet: please look at it before you approve.

PREVIEW — not approved for use

q13 why (shared by A and B) · round 1 · 🔎 Fact checker — **Not fixed: for you**

BEFORE · WHAT THE CHECKER CAUGHT	NOT FIXED YET
'Strong evidence: ... [5], [6] or [7] for the end.' Version B asks about Monday to Wednesday evening, so [7] (Thursday) is outside the question for B. Make the why per version: A as written; B '[2] or [4] for the start; [5] or [6] for Wednesday evening.'	Not fixed yet: please look at it before you approve.

q12 answer.B · round 1 · 🔎 Fact checker — **Not fixed: for you**

BEFORE · WHAT THE CHECKER CAUGHT	NOT FIXED YET
'stayed alive and common instead of dying off' adds 'common'; [6] says only 'Grubs held out for years.' Suggested: 'Kept going, stayed around instead of dying off; meanwhile some people called the plan a failure [6].' Minor, same kind: accept.B[1] 'people said the plan failed' could read 'some people said the plan failed', as in [6].	Not fixed yet: please look at it before you approve.

q5 accept.A[1] · round 1 · 🔎 Fact checker — **Not fixed: for you**

BEFORE · WHAT THE CHECKER CAUGHT	NOT FIXED YET
'she slides away into the dark' adds a detail: in [4] her eyes watch him 'from the dark, then slid away'; where she goes is not stated. Suggested: 'she watches from the dark, then slides away'. Minor.	Not fixed yet: please look at it before you approve.

q11 why.B · round 1 · 🔎 Fact checker — **Not fixed: for you**

BEFORE · WHAT THE CHECKER CAUGHT	NOT FIXED YET
'rain washed the soil in only because the roots were gone [5]': [5] gives the order (trees died, then rains washed soil) and says roots hold the soil, but not 'only because'. Drop 'only'. Minor.	Not fixed yet: please look at it before you approve.

PREVIEW — not approved for use

q3 why.A (Version A) ('He never leaves her alone for a night (he comes each day, Monday to Wednesday [2]-[6])') · round 2 · 🔎 Fact checker

Not fixed: for you

BEFORE · WHAT THE CHECKER CAUGHT

This is false by the passage. Kiran is a visiting pet sitter who goes home: he eats dinner with Tam on Monday [3] and talks with Tam on Tuesday [4]. So Biscuit is alone every night. That makes the wrong choice 'He remembers that he left her all alone one whole night' arguably true, not wrong for the reason the 'why' gives. Direction: replace the choice with one the passage contradicts, for example 'He sees that Biscuit is hiding from Dev.' Facts to check: [7] Biscuit 'was curled on the armchair, watching him'. Then rewrite this line of the 'why' to match. Sweep: q4 choices.A[0] and q4 why.A change with it (next finding). No other place says he never leaves her.

NOT FIXED YET

Not fixed yet: please look at it before you approve.

q4 choices.A[0] (Version A unmatched quote '"Kiran stayed at a friend’s house on Tuesday night." [4]') and q4 why.A · round 2 · 🔎 Fact checker

Not fixed: for you

BEFORE · WHAT THE CHECKER CAUGHT

This unmatched quote is missing from the passage, not contradicted by it. [4] shows Kiran at the apartment on Tuesday and talking with Tam, but never says where he spent the night. So the 'why' line 'on Tuesday he was at the apartment singing to her [4]' doesn't rule it out. Replace it along with the q3 A choice, using a quote the passage contradicts. Example direction, if the q3 choice becomes 'hiding from Dev': '"Biscuit ran under the bed when Dev came in." [7]'. Real line: 'Biscuit was curled on the armchair, watching him.' [7]. Facts to check: [7].

NOT FIXED YET

Not fixed yet: please look at it before you approve.

PREVIEW — not approved for use

q8 prompt.A, answer.A and why.A (Version A) · round 2 · 🔎 Fact checker — **Not fixed: for you**

BEFORE · WHAT THE CHECKER CAUGHT

The prompt asks why the South Lagoon's reeds 'stay healthy after 1961'. The article never says so: [2] says only that the South 'lost only a few' in the storm, and nothing later describes the South's reeds or drells. The key ('enough reeds for its drells to stay') is a two-step inference built on a premise the text doesn't give. Also, why.A cites 'so its drells had nests and stayed to eat the kibs [1]', but [1] says nothing about the South's drells. Its 'kibs ate every shoot [4]' widens [4], which says they were 'eating the new shoots down to the roots'. Direction, either (a) add one sentence to the article, e.g. at the end of [4]: 'In the South Lagoon, where the drells had stayed, the reeds were as thick as ever.' (facts to check: consistent with [2] 'lost only a few' and [1] 'nests only in thick reeds'; it does not clash with [5] or [6]), or (b) reword the prompt to 'The South Lagoon lost only a few reeds in the storm. Based on the article, what would most likely happen to its drells?' (key: 'They would stay, because they still had thick reeds to nest in.'). Either way, change 'every shoot' to 'the new shoots'.

NOT FIXED YET

Not fixed yet: please look at it before you approve.

q9 why.A (Version A) and q9 choices.A[0] ('to show that the 1961 storm was worse than any before it') · round 2 · 🔎 Fact checker — **Not fixed: for you**

BEFORE · WHAT THE CHECKER CAUGHT

why.A says 'The article never compares the 1961 storm with all earlier ones'. That's wrong: [3] says the reeds came back 'as they had after smaller storms', which does call the earlier storms smaller. So part of the wrong choice is supported by the text. It is still wrong as the author's purpose, but a student who reads [3] closely can defend it. Direction: replace the choice with a purpose the passage contradicts, e.g. 'to show that the storm hit the South Lagoon hardest' (facts to check: [2] the South 'lost only a few'). Fix the 'why' to match. Sweep: q10 why.A says the [2] storm line 'backs "worse than any before"' and must change with the choice.

NOT FIXED YET

PREVIEW — not approved for use

q8 why.B (Version B) ('the snails were thinner only once every platform was in use, by 1980 [6]') · round 2 · 🔎 Fact checker — Not fixed: for you

BEFORE · WHAT THE CHECKER CAUGHT	NOT FIXED YET
'Only once' widens [6]. It says that by 1980 every platform was in use and the snails were thinner, not that one waited on the other. Suggested: 'by 1980 every platform was in use and the snails were thinner [6]'. Minor.	Not fixed yet: please look at it before you approve.

q11 why.B (Version B) ('so the platforms went where reeds were still thick [5]') · round 2 · 🔎 Fact checker — Not fixed: for you

BEFORE · WHAT THE CHECKER CAUGHT	NOT FIXED YET
[5] says 'the last reed clumps', not that the reeds there were still thick. The drells had flown off 'with nowhere to nest' [2], so the clumps may not have been thick. The key ('drells will nest only where reeds grow thick') is a fair inference from [1]. The 'why' just shouldn't put 'still thick' in [5]. Suggested: 'so the platforms went into the last reed clumps [5], the only reeds left'. Minor.	Not fixed yet: please look at it before you approve.

q10 why.A (Version A) label · round 2 · 🔎 Fact checker — Not fixed: for you

BEFORE · WHAT THE CHECKER CAUGHT	NOT FIXED YET
The 'why' says the salt line [3] backs 'salt was killing the reeds', but the q9 A choice it pairs with reads 'to show that salt had poisoned the lagoon'. Make the label match the choice's wording. Minor, not a fact error.	Not fixed yet: please look at it before you approve.

q11 why.A (Version A) ('drells also feed at night [1]') · round 3 · 🔎 Fact checker — Not fixed: for you

BEFORE · WHAT THE CHECKER CAUGHT	NOT FIXED YET
The clause is true ([1] 'At night it wades through the mud'), but it argues for the wrong choice 'searching for the drells that had left'. It hands a student a reason to pick that rival. Direction: delete the clause. The key needs only [4].	Not fixed yet: please look at it before you approve.

q11 why.B (Version B) ('the only reeds left standing') · round 3 · 🔎 Fact checker — Not fixed: for you

BEFORE · WHAT THE CHECKER CAUGHT	NOT FIXED YET
'Standing' widens [5], which says only 'the last reed clumps'. [6] says reeds 'stood again' only by 1980. Minor. Suggested: 'the last reed clumps [5] were the only reeds left to hide the platforms in'.	Not fixed yet: please look at it before you approve.

Left for you to decide (13)

READING CHECK: "BISCUIT" AND "THE REEDS OF THE NORTH LAGOON" A q3 · round 3 · 🙈 Blind tester (ELA) — **For you to decide**

BEFORE · WHAT THE CHECKER CAUGHT	WHY IT IS LEFT FOR YOU
Key C (he realizes Biscuit ate the food) is the best reading with [1]. But D, not wanting to blame Dev in front of him, is a defensible social reading of 'looked at Dev and stopped', and D's 'for the food in front of him' is unclear. Teacher decides: keep D and say C is better because of the Thursday note, or reword D so the passage rules it out (e.g. a motive that [7] contradicts).	Left for you to decide.

READING CHECK: "BISCUIT" AND "THE REEDS OF THE NORTH LAGOON" B q10 · round 3 · 🙈 Blind tester (ELA) — **For you to decide**

BEFORE · WHAT THE CHECKER CAUGHT	WHY IT IS LEFT FOR YOU
D (chased the last drells off with nets) is an unmatched quote, but the passage only weakly contradicts it ([2]: drells flew off because there was nowhere to nest; no nets are mentioned). Check that its why says unmatched and points to [2]; otherwise swap it for a real quote.	Left for you to decide.

READING CHECK: "BISCUIT" AND "THE REEDS OF THE NORTH LAGOON" B q7 · round 3 · 🙈 Blind tester (ELA) — **For you to decide**

BEFORE · WHAT THE CHECKER CAUGHT	WHY IT IS LEFT FOR YOU
Key A (higher dunes) is stated in [2]. Some readers may infer D (farther from the open sea) from 'behind higher dunes'. The passage never says it, so it's probably fine, but the teacher may want D changed to something the passage rules out.	Left for you to decide.

READING CHECK: "BISCUIT" AND "THE REEDS OF THE NORTH LAGOON" A q12 · round 3 · 🙈 Blind tester (ELA) — **For you to decide**

BEFORE · WHAT THE CHECKER CAUGHT	WHY IT IS LEFT FOR YOU
'Thinner' here means fewer/less crowded, which a non-reader can guess from everyday sense. Credit for the meaning alone should stay at half or less, with the rest for the [4] 'crowded with kib snails' quote. Check that accept/why name [4].	Left for you to decide.

PREVIEW — not approved for use

q8 prompt.A ('which change would most likely show up first?') · round 1 · 🔎 Fact checker — **For you to decide**

BEFORE · WHAT THE CHECKER CAUGHT

'Show up' can mean 'be noticed'. In the East Valley the first thing people noticed was the trees dying [3]; the grubs were only found when Marrow dug in 1979 [4]. A careful reader could defend choice C. Suggest 'which change would most likely happen first?' so the key (more grubs) is the only fair answer.

WHY IT IS LEFT FOR YOU

Left for you to decide.

q3 choices.A[0] and q4 choices.A[0] · round 1 · 🔎 Fact checker — **For you to decide**

BEFORE · WHAT THE CHECKER CAUGHT

Choice A ('He does not want Dev to hear that he had any trouble') is not contradicted by the passage: [7] says only that he 'looked at Dev and stopped'. The key (Biscuit ate after all) is the better inference from [1]+[3]+[7], but the distractor is unrefuted, not false. Also, the Part B choice '"then looked at Dev and stopped" [7]' fits the key as well as choice A; the key line [1] is needed for the full inference, so it is still 'best'. Teacher to decide whether to keep.

WHY IT IS LEFT FOR YOU

Left for you to decide.

q10 choices.B[1] ('Today, though, young hesk trees grow on the East Valley's lower slopes' [6]) · round 1 · 🔎 Fact checker — **For you to decide**

BEFORE · WHAT THE CHECKER CAUGHT

This line also supports the Part A key (ambrels protected the trees): trees come back after the ambrels are returned in 1985 [6]. The key line [4] (droppings full of grub shells) is more direct, but the why's claim that [6] only 'backs "plant new trees"' undersells it. Consider a different distractor, or note in the why that [6] is weaker because it does not show what the ambrels ate.

WHY IT IS LEFT FOR YOU

Left for you to decide.

PREVIEW — not approved for use

passage p2 source (byline) · round 1 · 🔎 Fact checker — For you to decide

BEFORE · WHAT THE CHECKER CAUGHT	WHY IT IS LEFT FOR YOU
The byline 'Written for this quiz. Corvan Island, its people and its animals are invented.' is clear. But the paragraphs themselves use real-looking years (1979, 1985) and 'about eighty years ago', so without the byline the article reads as real history. Confirm the byline prints on the student page next to the passage, not only in the data.	Left for you to decide.

q8 choices.B[0] ('Salt from the 1961 storm was still in the mud.') with q8 why.B; also q7 why.A on choices.A[2] · round 2 · 🔎 Fact checker — For you to decide

BEFORE · WHAT THE CHECKER CAUGHT	WHY IT IS LEFT FOR YOU
Both 'why' lines answer salt choices with 'Selk found the water no saltier [than the South's] [4]'. In q8 B, Selk tested the water, not the mud. In q7 A the choice compares the lagoon with 'the years after the storm', not with the South. Both choices stay wrong, because [4] and [8] put the cause on the snails and the missing birds. But the 'why' doesn't quite refute the choice as worded. Suggested: change q8 B to '...was still in the water' so [4] answers it directly. In q7 why.A, say the article never ties salt to the fish catch.	Left for you to decide.

passage p2 source (byline) · round 2 · 🔎 Fact checker — For you to decide

BEFORE · WHAT THE CHECKER CAUGHT	WHY IT IS LEFT FOR YOU
Same concern as round 1, now about the new article. The byline says it is invented, but the paragraphs use real-looking years (1961, 1968, 1971, 1980) and a named teacher, so without the byline it reads as real history. Confirm the byline prints next to the passage on the student page.	Left for you to decide.

PREVIEW — not approved for use

q3 choices.A[3] ('He does not want to blame Dev for the food in front of him.') and q4 choices.A[2] · round 3 · 🔎 Fact checker — For you to decide

BEFORE · WHAT THE CHECKER CAUGHT
Kiran 'looked at Dev and stopped' [7]. That fits a reading where he still believes Dev tossed the food but won't say so to Dev's face. The passage doesn't rule this out. The 'why' line's 'nothing to blame him for' assumes he already sees the key. It stays wrong only because [1] shows Dev wasn't coming until Thursday, and that is the same step the key uses. The key is still the stronger reading. The unmatched quote 'Dev's watering can' [3] is contradicted only by the same inference from [1], not by a line in the passage. The teacher can accept it, or drop 'for the food' to weaken the rival.

Looked at and kept on purpose (20)

READING CHECK: "BISCUIT" AND "THE REEDS OF THE NORTH LAGOON" A q1 · round 3 · 🙈 Blind tester (ELA) — Looked at and kept

BEFORE · WHAT THE CHECKER CAUGHT	WHY IT WAS KEPT
My no-passage guess (C) was the story-type default but only at confidence 2. With the passage it's solid ([1] 'perfect score'). Watch it if the final probe gets it at 4-5.	

PREVIEW — not approved for use

READING CHECK: "BISCUIT" AND "THE REEDS OF THE NORTH LAGOON" A q4 · round 3 · 🙈 Blind tester (ELA) — Looked at and kept

BEFORE · WHAT THE CHECKER CAUGHT

Unmatched quote C (Dev's watering can by the bowl, [3]) is contradicted by [1]/[7] and is a good trap. B q4 A/B are also properly contradicted ([5] no energy for singing, [6] did not reach for her). One pair per passage per version: OK.

WHY IT WAS KEPT

passage p2, all paragraphs (internal consistency) · round 1 · 🔎 Fact checker — Looked at and kept

BEFORE · WHAT THE CHECKER CAUGHT

No paragraph contradicts another. Dates and order: hens ~80 years ago [2], ambrels scarce within 10 years [2], then trees die [3], 1979 dig [4], 1985 move [6], today [6]. Places: East Valley = bounty, dying trees, grubs, washed soil, regrowth; West Valley = few farms, left alone, green trees, few grubs, ambrel source for 1985. 'Both valleys were once covered' [1] is consistent: the East lost its cover, so 'both' is no longer true. Marrow's 'the island' [7] is figurative and fine.

WHY IT WAS KEPT

passage p2 (real-world check) · round 1 · 🔎 Fact checker — Looked at and kept

BEFORE · WHAT THE CHECKER CAUGHT

Corvan Island, the hesk tree, the ambrel, the lomas beetle and Ilse Marrow are not real places, species or people known to me. 'Lomas' is a real Spanish word (and a name for Peruvian fog-hill habitats), but there is no well-known 'lomas beetle'. Gulls, hens and a 'cold northern sea' are generic. The bounty-and-backlash pattern echoes real cases in general, but no specific real event is named or retold.

WHY IT WAS KEPT

PREVIEW — not approved for use

q4 and q10 Part B keys and unmatched quotes (both versions) · round 1 · 🔎 Fact checker — Looked at and kept

BEFORE · WHAT THE CHECKER CAUGHT

Every Part B key is an exact quote and proves its Part A key: q4 A '"Dev will come Thursday to water the plants." [1]'; q4 B '"She stayed until he finished the last problem." [6]'; q10 A '"But the West Valley had the same dry summers, and its trees stayed green." [3]'; q10 B '"she found ambrel droppings full of grub shells" [4]'. All four unmatched quotes are contradicted by the passage, and each why gives the real line: 'Nothing had spilled.' [3]; 'He shook the food bag and tapped the bowl with a spoon, louder each time.' [2]; 'A rocky ridge splits it into two valleys, East and West.' [1] (and [3]: same dry summers); 'A gray lizard called the ambrel lives among their roots.' [1].

WHY IT WAS KEPT

q1, q2 B, q5 B, q6, q7, q11 A, q12 A, q13 answers · round 1 · 🔎 Fact checker — Looked at and kept

BEFORE · WHAT THE CHECKER CAUGHT

Keys say no more than the passage, whys quote it exactly, and no wrong choice is true by the passage. Checked: q1 A ('She won't touch anything I give her' [3]), q1 B ('Or you're loud' [4]), q2 B ('like a test' [1]), q5 B model and accepts ([2]), q6 A/B ([2], [4]), q7 A/B ([5], [6]; ellipsis marked), q11 A ('hunt by smell under the ground' [4]), q12 A model and both accepts (exact [4] sentences), q13 A/B models ('louder each time' [2], 'did not reach for her' [6], 'sang to her' [4]).

WHY IT WAS KEPT

PREVIEW — not approved for use

passage p2, all paragraphs (internal consistency) · round 2 · 🔎 Fact checker — Looked at and kept

BEFORE · WHAT THE CHECKER CAUGHT

No paragraph contradicts another. Dates and order: 1961 storm [2]; shoots fail each spring and summer [3]; 1968 test [4]; hand planting, then 1971 platforms, first pairs the next spring [5]; five slow summers, then by 1980 the reeds are back [6]. Places: North = flattened, drells gone, snails crowded, platforms, regrowth; South = higher dunes, lost only a few, used as Selk's salt comparison. Who did what: the storm flattened the reeds; the drells flew off; some fishermen were glad; islanders blamed salt; Selk tested and found the snails; islanders planted by hand; Selk's students built the platforms. Cause chain: storm -> no nests -> drells leave -> snails unchecked -> shoots eaten -> reeds stay down. Platforms bring drells back -> fewer snails -> reeds return -> young fish shelter. This matches Selk's quote [8]. Two points I checked and kept: (1) drells 'nest only in thick reeds' [1] yet use wooden platforms, which is fine because the platforms sit inside reed clumps [5]; (2) 'last reed clumps' [5] after the reeds were 'flattened' [2] is fine, because 'flattened' doesn't mean every clump died.

WHY IT WAS KEPT

passage p2 (no real place, species or event) · round 2 · 🔎 Fact checker — Looked at and kept

BEFORE · WHAT THE CHECKER CAUGHT

No real island, species, person or event is named. Vessa Island, tolla reeds, the drell, the kib snail and Hana Selk are not real islands, species or people that I know of. Two near-misses, both fine: 'Vessa' is also the name of a real village on Chios, Greece, but not an island. 'Tolla' is a village in Corsica, not a plant. The 1961 storm is unnamed and generic. The story pattern (predator lost -> grazers strip the marsh -> predator returns) echoes real marsh ecology in general, but no real case is retold.

WHY IT WAS KEPT

PREVIEW — not approved for use

Part B keys and unmatched quotes: q4 B, q10 A, q10 B · round 2 · 🔎 Fact checker — Looked at and kept

BEFORE · WHAT THE CHECKER CAUGHT

Every Part B key is an exact quote that proves its Part A key: q4 A "'Dev will come Thursday to water the plants." [1]'; q4 B "'Biscuit sat beside him, staring at the page as if she were checking his work." [6]'; q10 A "'Each spring, green shoots poked up from the mud, and each summer they were gone." [3]'; q10 B "'They believed drells ate young fish, though no one had ever seen one do it." [2]'. The other unmatched quotes are contradicted, and each 'why' gives the exact real line. q4 A, Biscuit hides/keep quiet: the real [1] line is 'Biscuit is shy with new people...', and she sits beside him in [6]. q4 B, purred when he sang: [4] 'Two green eyes watched him from the dark, then slid away.' q4 B, wanted Dev to see: in [3] he says 'She won't touch anything I give her.' q10 A, many years: [3] 'Everyone expected the reeds to come back in a year or two, as they had after smaller storms.' q10 B, hunts young fish: [1] 'At night it wades through the mud and eats kib snails' and [2] 'no one had ever seen one do it.' The q4 A unmatched quote is the exception (finding above).

WHY IT WAS KEPT

q1, q2, q3 B, q5, q6, q7, q9 B, q11 A, q12, q13 (both versions) · round 2 · 🔎 Fact checker — Looked at and kept

BEFORE · WHAT THE CHECKER CAUGHT

In these items, keys say no more than the passage, the 'why' lines quote it exactly, and no wrong choice is true by the passage. q1 A/B: [3], [4]. q2 A/B: [5]; 'Nothing had spilled.' [3]. q3 B: [6], [7]. Biscuit missing Mrs. Abara is contradicted, since Mrs. Abara is home in [7]. q5 models and accepts: [4], [2], quoted exactly. q6 A/B: [5]. q7 A: [6], [7]. q7 B: [2]; 'much less salty' is contradicted by [4]. q9 B: [2], [7]. q11 A: [6]. q12 A: the exact [4] sentence. q12 B: [3], [4], [6]. q13 models: 'louder each time' [2], 'did not reach for her' [6].

Changed items, both versions (A q1-q4, q6-q12; B q2-q4, q8-q12) · round 3 · 🔎 Fact checker — Looked at and kept

BEFORE · WHAT THE CHECKER CAUGHT	WHY IT WAS KEPT
Every key is backed. A q1 [1]; A q2 [5]; B q2 [3]; A q3 [1], [3], [7]; B q3 [6], [7]; A q6 [5]; A q7 [1], [2], [5]; A q8 [2]-[4]; B q8 [5], [6]; A q9 [4], [5]; B q9 [2], [7]; A q11 [4]; B q11 [1], [5]; A q12 [4]; B q12 [5]. Each unmatched quote is contradicted, with the real line quoted. q4 A 'watering can' [3]: the note in [1] and the real [3] line. q4 B 'rubbed her head' [6]: 'Kiran did not reach for her.' q4 B 'sang softly' [5]: 'no energy for singing'. q10 A 'stood tall' [5]: 'The snails ate those too.' q10 B 'counted dozens' [1]: 'eats kib snails' and the [2] line. q10 B 'chased ... with nets' [2]: 'flew off'. The real but non-key quotes back their rivals: the shy line, the armchair line, the salt line, 'Some fishermen were glad.', 'She misses Mrs. Abara...', and 'catch did not drop'.	

q8 choices.B[0] salt / q7 why.A · round 2 · 🔎 Fact checker — Looked at and kept

BEFORE · WHAT THE CHECKER CAUGHT	WHY IT WAS KEPT
Confirmed fixed. q8 B now says 'water', so [4] answers it directly. q7 A was rewritten, and its salt rival is now answered by 'the kibs crowded the mud' [4].	true

PREVIEW — not approved for use

The checks, round by round

Each check is run by a fresh agent that didn't write the work. Early rounds catch problems; the last round of each check is what this pack passed.

🙈 Blind tester: solved the student copy with no key

Round	Agent	Matched the key	Right without the passages	Findings
1	🙈 No-passage probe (ELA)	**7 of 10**	A: 7 of 10 (failed)	5
1	🙈 No-passage probe (ELA)	**9 of 10**	B: 9 of 10 (failed)	6
2	🙈 No-passage probe (ELA)	**8 of 10**	A: 8 of 10 (failed)	3
2	🙈 No-passage probe (ELA)	**6 of 10**	B: 6 of 10 (failed)	2
3	🙈 No-passage probe (ELA)	**9 of 10**	A: 9 of 10 (failed)	3
3	🙈 No-passage probe (ELA)	**5 of 10**	B: 5 of 10 (failed)	2
3	🙈 Blind tester (ELA)	**20 of 20**	A: 10 of 10 · B: 7 of 10	15

Later rounds recheck only the questions that changed. Where the blind tester's answer didn't match the key, the question was looked at again (see the findings). "Right without the passages": answered from the questions alone, before reading; a reading question should need the passage, so about 40% or more right (chance is 25%) fails the round and the questions are redesigned.

🧮 Solver: worked every answer on its own

Not used for this subject.

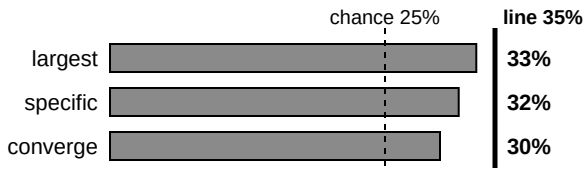

🤖 Wilco: are the keys sound, and could a student guess without knowing?

The keys check reads every question row: one right answer, keys in range, A and B testing the same skills at the same levels.

Round	Keys check	Rows	Errors	Warnings
1	**passed**	26	0	0

Each test-wise bot answers with a trick (pick the longest choice, the largest number, and so on). A bot passes when it scores no higher than the line, 10 points above chance. A bot is only judged when there are enough questions of its kind (a number bot needs 3 questions with number choices); with fewer, one question would swing it, so it is shown greyed and not judged.

Round 1: passed on 20 choice questions. Chance 25%, line 35%, highest judged bot: largest at 33%.

Round 1: passed on 20 choice questions. Chance 0%, line 10%.

🔎 Fact checker: every claim, date, name and term

Round	Claims checked	Flagged	Notes
1	162	14	Adapted brief: p2 ('Trouble in the East Valley') is invented on purpose (owner's decision), so it was checked for INTERNAL consistency only, not against an outside reference. Claim count = 36 article claims (p2 [1] 5, [2] 7, [3] 5, [4] 9, [5] 4, [6] 5, [7] 1) + 26 keys + 26 'why' lines + 8 accept entries + 4 short-answer models + 2 RACE models + 60 wrong choices (10 MC x 3 x 2 versions). The article has no contradiction between paragraphs: timeline (hens about eighty years ago [2] -> ambrels hard to find within ten years [2] -> East trees die [3] -> Marrow digs in 1979 [4] -> 200 ambrels moved West to East in 1985 [6] -> young trees today [6]), places (ridge, East/West valleys), who did what (farmers paid children [2]; islanders blamed dry summers [3]; Marrow dug [4]; islanders carried ambrels [6]) and the cause chain (ambrels removed -> grubs -> roots chewed -> trees die -> soil washes -> fish scarce) all hold. Every 'why' quote and every Part B choice was compared word for word with the passage: all exact (q7 A uses a marked ellipsis). All four unmatched quotes are contradicted, not just missing, and their whys give the real line. Main problems are in the keys/whys: one false statement about Mrs. Abara's notes (q2 A), several 'why' or key lines that widen 'most likely' or say 'only' where the passage does not, two wrong choices that the passage arguably supports (q3 B choice B, q9 B choice A), and the shared q13 'why' allowing [7] for Version B. No sweep hits beyond those listed. Real-world check done from knowledge; no web search was run.
2	166	9	Adapted brief, round 2. p2 is now 'The Reeds of the North Lagoon' (Vessa Island, invented on purpose, the owner's decision). Following the brief, I checked it only against itself. Claim count = 46 article claims (p2 [1] 8, [2] 9, [3] 5, [4] 7, [5] 6, [6] 6, [7] 3, [8] 2) + 20 MC keys + 4 short-answer models + 2 RACE models + 26 'why' lines + 8 accept entries + 60 wrong choices (10 MC x 3 x 2 versions) = 166. No paragraph of the article contradicts another. The timeline holds: storm in winter 1961 [2] -> shoots fail each summer [3] -> Selk tests in 1968 [4] -> hand planting, then platforms in 1971, first pairs the next spring (1972) [5] -> five slow summers -> reeds back by 1980 [6]. The q8 B prompt's '1972' is worked out correctly from [5]. I compared every 'why' quote and every Part B choice with the passage word for word, and all are exact. All 4 Part B keys are exact and prove their Part A keys. Three of the four unmatched quotes are contradicted by the passage. The fourth (q4 A, 'friend's house on Tuesday night') is only missing, not contradicted. All round 1 story findings are fixed. All round 1 article findings are marked fixed with 'article replaced'. New problems: one false 'why' line in the story (q3 why.A), one unmatched quote that the passage doesn't contradict (q4 A), one prompt that assumes something the article never says (q8 A), one 'why' that denies a comparison [3] does make (q9 why.A), and three small widenings. Style only, not a fact issue: q9 why.B's third sentence starts lowercase and repeats the second. I didn't run a web search. The real-name check below is from memory.

3	118	3	Round 3 recheck, adapted brief. p2 (Vessa Island) is invented on purpose, so I checked it only against itself. No passage sentence changed: both passages match the round 2 text word for word, so I didn't need a new cross-paragraph check. I checked every changed item in both versions: A q1-q4, q6-q12 and B q2-q4, q8-q12. Claim count = 22 keys and models + 66 wrong choices + 22 'why' lines + 8 Part B quotes. Results: every key says no more than its passage. Every 'why' quote and every Part B choice is exact. All 4 Part B keys are exact and prove their Part A keys: q4 A [1], q4 B [6], q10 A [5], q10 B [2]. All 5 unmatched quotes are contradicted by the passage, and each 'why' gives the real line. No wrong choice is true by the passage, except for one judgment call (A q3 D). All 9 round 2 findings are fixed except the byline JUDGMENT, which carries over. I found 2 new minor FIXes, both in 'why' lines. Sweep: the 'left standing' wording appears only in q11 why.B. The 'drells also feed at night' clause appears only in q11 why.A. I didn't run a web search; none was needed.

What the auditor changed

After the order, the auditor reads every finding and changes the agents' briefs so the same mistake is less likely next time.

Changes to the agents' briefs

- [object Object]

Notes

- Open for the teacher: the no-passage gate fails for both versions after 3 rounds. In the final probes, version A got 9 of 10 right without the passage and version B got 5 of 10 (the line: 5 or more of 10 fails, so each version needed 4 or fewer). Still open: 2 small fact FIX (A q11 and B q11, in the "why" lines) and 7 FIX from the keyless solve (answer pairs A q9/q10 and B q9/q10 give each other away; A q8, A q11 and B q8 can be guessed from other items; B q12 fits an everyday meaning; B q3 is easier than A q3). Four JUDGMENT questions are also open, including whether the "invented place" line in the byline is enough. This pack is not ready to hand out as final.
- What this attempt tried (owner's decision "try c"): an invented nonfiction article instead of a real-world one, and at least 8 multiple choice per version (10 were made). No preview was sent to the teacher and there is no approval, so there is no final section.
- Round 1: the maker kept the story "Biscuit" (374 to 350 words) and wrote "Trouble in the East Valley" (316 words). The fact checker found no contradictions in the article (checked against itself, since it is invented) and flagged 14 items: 10 FIX, 4 JUDGMENT. No-passage probe: A 7 of 10, B 9 of 10. Cues were mostly other items giving the answer away (A 5, B 6), some general topic knowledge (A 2), plus 2 by question type and 1 by sound in B. Fail.
- Round 2: the maker threw out the article and wrote "The Reeds of the North Lagoon" (322 words), built so the familiar cause chain does not work (storm, not hunting; salt blamed wrongly; hand planting first). The fact checker confirmed the round 1 items gone with the old article and found 7 new FIX and 2 JUDGMENT. Probe: A 8 of 10, B 6 of 10. Cues: other items 4 + 4, topic 2 + 1. Fail.
- Round 3 (last round allowed): the maker made the answer pairs symmetric and applied the fact FIX. Fact recheck: 7 of the round 2 FIX and 1 JUDGMENT confirmed fixed, 2 new minor FIX, 2 JUDGMENT. Final whole-version probes: A 9 of 10 (other items 7, question type 1, guess 1), B 5 of 10 (other items 5). No short answer got more than half credit in any probe (the keyless solver thinks B q12 might). Fail.
- Keyless solve (both versions, with passages): 20 of 20 multiple-choice keys confirmed and the 4 short answers match in substance. It logged 13 items: 7 FIX, 4 JUDGMENT, 2 KEEP (the open ones are listed above).
- Fact checks in all: 3 checks, 14 + 9 + 3 new items flagged (round 1: 10 FIX, 4 JUDGMENT; round 2: 7 FIX, 2 JUDGMENT; round 3: 2 FIX, 2 JUDGMENT). Every FIX from rounds 1 and 2 is fixed or replaced; the 2 new in round 3 are open. The byline JUDGMENT was raised in each round and is still open.
- Wilco: one run is in the record (keys, test-wise bots, no-passage bots), all passing. Worst test-wise bot: largest-choice picked the key 33.3% of the time, chance 25%. No-passage bots: worst was echo at 25%, equal to chance. Keys: 26 rows, 0 errors. The record has no separate before/after runs for rounds 2 and 3, so no before/after figures are given. Note that the bots pass while the model probes fail: the model probes catch answers that follow from other items, which the bots do not.
- Time and cost (exact: each from its own session record; the tokens are the sessions' reported totals, with no input/output/cache split in the hand-off, and reported tokens can understate billed use, so the dollars

PREVIEW — not approved for use

are the figure to trust): agent minutes 44.7; tokens 10,125,326; cost $12.77 from the rows (the lead logged $12.76; the 1 cent is rounding). That includes the lead's runner test, 0.1 minute and $0.11. Wall-clock time cannot be given: the hand-off has no start and end times, only one Wilco timestamp (17:27 UTC). The lead's own steps are not measured.

- Running cost against the budget: the order's budget is $16.50 (165 tokens x $0.10) and the hard stop for this attempt was $15. After round 1: $4.00. After round 2: $8.49. After round 3: $12.77. That is 77% of the budget, under the hard stop and well under 2x, so no cost stop was hit. Each maker stayed under its cap ($2.42 of $4.10; $2.98 of $3.50; $1.88 of $2.75). Cost per version: about $6.39 (half of the total).
- Hours worked in plain terms: 14 sessions across 3 rounds, 8 of them checks that tried to answer the questions without the passage or without the key. Round 3 made the 3 rounds' best result for A but B's gate result got better too (9, 6, then 5 of 10); A went the other way (7, 8, then 9 of 10).
- Hidden sample stays hidden. This attempt's records go to samples/g7-ela2/attempts/try-c/; the earlier g7-ela2 pack stays the sample. A fresh auditor writes the proposals.
