How your pack was made

Making inferences and citing text evidence (fiction and nonfiction) · grade 7 english / reading · for Mr. Haverford (made-up sample) · 2026-11-05

> The maker wrote 22 questions (counting each version). 4 separate agents that didn't write them checked the work over 3 rounds. 17 problems needed a fix: 0 fixed, 17 not fixed yet and left for you. 1 more was looked at and kept on purpose. 2 are judgment calls left for you to decide.

6

agents involved

17 logged steps. The agent that writes never checks its own work.

3

rounds of checks

9 check runs by fresh agents, plus 4 Wilco runs; each round rechecks the fixes.

8

questions checked

22 in the pack, each version counted.

17 → 0 fixed

catches found and fixed

1 kept on purpose · 2 left for you to decide · 17 not fixed yet

38.9

minutes of agent work

Logged from not measured to not measured; 4 steps not timed.

$11.84

AI cost of this pack

10,591,350 tokens, added up from the log.

Preview: not approved yet. Nothing is released until the teacher signs off in REVIEW.html.

In this pack

READING CHECK: "BISCUIT" AND "THE REEDS OF THE NORTH LAGOON" (versions A, B) · RACE CHECKLIST

Check it before students see it. Made with AI from the source material you provided, then checked by separate AI agents. Please review everything before it goes in front of students.

PREVIEW — not approved for use

Every step, in order

The reporter logged each step as it happened: who did it, what they did, how long it took and what it cost. A dash means the step wasn't timed.

What your agents learned from your examples

- First line: Name ____ Class ____ Date ____.
- Title in ALL CAPS with (Form A) or (Form B).
- Plain text, no boxes; long underscore answer lines.
- Questions 1. 2.; choices A.–D. one per line; one-word choices lowercase.
- Part A and Part B each numbered; evidence choices are short quotes ending in [paragraph].
- Short, plain directions; constructed response on the back with RACE spelled out.
- About grade 7 reading level; short sentences; American spelling.

PREVIEW — not approved for use

What the checkers caught, and how it was fixed

20 findings in all. 17 problems needed a fix: 0 fixed, 17 not fixed yet and left for you. 1 more was looked at and kept on purpose. 2 are judgment calls left for you to decide. Wrong choices and wording were fixed; answer keys were never changed just to pass a check.

Not fixed yet (17)

READING CHECK: "BISCUIT" AND "THE REEDS OF THE NORTH LAGOON" A q2 · round 1 · 🙈 No-passage probe (ELA) — **Not fixed: for you**

BEFORE · WHAT THE CHECKER CAUGHT	NOT FIXED YET
Right without the passage at confidence 4; cue (type): Shy-pet story: he holds still so he won't scare her off again. A and C conflict with her coming close and the story's arc; B sounds weak.	Not fixed yet: please look at it before you approve.

READING CHECK: "BISCUIT" AND "THE REEDS OF THE NORTH LAGOON" A q4 · round 1 · 🙈 No-passage probe (ELA) — **Not fixed: for you**

BEFORE · WHAT THE CHECKER CAUGHT	NOT FIXED YET
Right without the passage at confidence 4; cue (sounds): 'to hint' is the only inference-style choice; a blanket on an armchair in a shy-cat story = a cat nest. B contradicts it, A and D are odd.	Not fixed yet: please look at it before you approve.

READING CHECK: "BISCUIT" AND "THE REEDS OF THE NORTH LAGOON" A q9 · round 1 · 🙈 No-passage probe (ELA) — **Not fixed: for you**

BEFORE · WHAT THE CHECKER CAUGHT	NOT FIXED YET
Right without the passage at confidence 4; cue (type): Restoration-article pattern: doubters early, then success. A conflicts with doubters; C and D conflict with a project that apparently worked.	Not fixed yet: please look at it before you approve.

READING CHECK: "BISCUIT" AND "THE REEDS OF THE NORTH LAGOON" B q3 · round 1 · 🙈 No-passage probe (ELA) — **Not fixed: for you**

BEFORE · WHAT THE CHECKER CAUGHT	NOT FIXED YET
Right without the passage at confidence 4; cue (type): Shy-pet story default: the animal comes out when you stop trying and stay quiet; A/B/C read as the kid's mistaken theories.	Not fixed yet: please look at it before you approve.

READING CHECK: "BISCUIT" AND "THE REEDS OF THE NORTH LAGOON" B q9 · round 2 · 🙈 No-passage probe (ELA)

Not fixed: for you

BEFORE · WHAT THE CHECKER CAUGHT	NOT FIXED YET
Right without the passage at confidence 4; cue (sounds): Only choice that sounds like an evidence-based conclusion clearing the drells; 'proved... only' is extreme, C/D contradict the restoration story	Not fixed yet: please look at it before you approve.

q9 version B, key D + choice B + why · round 1 · 🔎 Fact checker

Not fixed: for you

BEFORE · WHAT THE CHECKER CAUGHT	NOT FIXED YET
The key 'later events showed it was wrong' says more than [7]. A catch that did not drop and 'if anything, rose' does not show drells never eat young fish; it fits small harm just as well. So wrong choice B ('It was true, but the harm to the fish was small') is not ruled out by any paragraph, and the why's 'there is no sign of harm' is an absence, not a contradiction. Direction: key -> 'It was only a guess, and the catch after the drells returned did not back it up'; B -> something [7] contradicts, e.g. 'It was proved true when the catch dropped.' Facts to check: [2] 'no one had ever seen one do it'; [7] 'did not drop... If anything, it rose.'	Not fixed yet: please look at it before you approve.

q3 version A, choice B ('Mrs. Abara will think he did a bad job with Biscuit') · round 1 · 🔎 Fact checker

Not fixed: for you

BEFORE · WHAT THE CHECKER CAUGHT	NOT FIXED YET
No paragraph rules this out. Kiran wanted 'a perfect score' [1] and stops mid-confession [7], so worry about looking bad is a fair reading. The why's 'she talks kindly about his notebook' does not contradict it. Replace B with a choice a paragraph contradicts, e.g. 'Dev fed Biscuit every day while Kiran was at school' (contradicted by [1] 'Dev will come Thursday' and [7]).	Not fixed yet: please look at it before you approve.

PREVIEW — not approved for use

q8 version A, choice C ('This storm chased away the fish that kept the mud clean') + why · round 1 · 🔎 Fact checker

Not fixed: for you

BEFORE · WHAT THE CHECKER CAUGHT	NOT FIXED YET
This choice is unsupported, not contradicted. Nothing in p2 says fish left after 1961, and the why's 'no fish are said to clean the mud' admits this. [7] says only that young fish hide among reed stems. Replace C with a choice a paragraph contradicts, e.g. 'This storm killed the old roots, so nothing could sprout' (contradicted by [3]: green shoots came up each spring).	Not fixed yet: please look at it before you approve.

q4 version B, why · round 1 · 🔎 Fact checker

Not fixed: for you

BEFORE · WHAT THE CHECKER CAUGHT	NOT FIXED YET
The why says Tam 'answers his ideas directly in [3] and [4]'. In [3] Tam speaks first ('So she ate!') and Kiran answers her. Cite [4] only, or say she responds to him in [3] as well.	Not fixed yet: please look at it before you approve.

q5 version B, accept list item 2 · round 1 · 🔎 Fact checker

Not fixed: for you

BEFORE · WHAT THE CHECKER CAUGHT	NOT FIXED YET
'quoting a [2] sentence' would give credit for 'On Monday morning the apartment was silent' or 'He walked to school with his shoulders up near his ears', and neither shows what he does to get her out. Name the lines that earn credit: '"Here, kitty, kitty!"' or 'He shook the food bag and tapped the bowl with a spoon, louder each time.' Make the same change in the why ('a [2] sentence').	Not fixed yet: please look at it before you approve.

q9 version A, key D ('a likely reason the catch rose once the reeds came back') + why ('the catch rose with the drells back') · round 2 · 🔎 Fact checker

Not fixed: for you

BEFORE · WHAT THE CHECKER CAUGHT	NOT FIXED YET
[7] hedges: the catch 'did not drop... If anything, it rose.' The key and the why both say the catch rose as a plain fact. Direction: key -> 'to give a likely reason the catch held up, or even rose, once the reeds came back'; why -> 'the catch did not drop, and may have risen, with the drells back [7]'. Facts to check: [7] 'did not drop', 'If anything, it rose.'	Not fixed yet: please look at it before you approve.

PREVIEW — not approved for use

q9 version A, choice A ('to show that the thick reeds kept young fish safe from the hungry drells at night') · round 2 · 🔎 Fact checker

Not fixed: for you

BEFORE · WHAT THE CHECKER CAUGHT

This is unsupported, not contradicted. It is the same gap as round 1 q9B. [1] says drells eat kib snails, not that they eat only snails. [2] says no one had seen a drell eat a fish, which leaves it possible. And a steady catch with drells back [7] fits 'reeds hid the fish from drells' just as well. Replace A with a choice a paragraph contradicts, e.g. 'to show why the reeds came back on their own after smaller storms' (no fish link: [3]), or 'to explain why the fishermen were glad the drells left' (contradicted: their reason was the drells eating fish [2], and hiding places are not part of it). Facts to check: [1], [2], [3].

NOT FIXED YET

Not fixed yet: please look at it before you approve.

q9 version B, key B ('No one ever saw a drell eat one, and the catch held when they returned.') · round 2 · 🔎 Fact checker

Not fixed: for you

BEFORE · WHAT THE CHECKER CAUGHT

[2] says no one 'had ever seen one do it', which is true as of 1961. The article says nothing about whether anyone saw one after the drells returned. 'No one ever saw' stretches this to all time. Direction: 'No one had ever seen a drell eat one, and the catch held when they returned.' The why already quotes [2] correctly. This is the only place in the sweep.

NOT FIXED YET

Not fixed yet: please look at it before you approve.

q8 version B, choice B ('Young fish ate the new shoots before the drells could help.') + why · round 2 · 🔎 Fact checker

Not fixed: for you

BEFORE · WHAT THE CHECKER CAUGHT

This is unsupported, not contradicted. [4] names the kibs as the shoot-eaters but does not say they were the only ones, and [7] says only that fish hide among stems. The why's 'young fish hide among reed stems [7]' does not rule it out. Replace it with a choice a paragraph contradicts, e.g. 'The drells did not move onto the platforms for several years' (contradicted by [5]: 'Two pairs of drells moved in the next spring'). Facts to check: [5].

NOT FIXED YET

Not fixed yet: please look at it before you approve.

PREVIEW — not approved for use

q3 version A, choices B ('Mrs. Abara came home early that day') and C ('Dev was supposed to come by that day') + why · round 3 · 🔎 Fact checker

Not fixed: for you

BEFORE · WHAT THE CHECKER CAUGHT

In [7], 'that day' is Thursday. Choice C is TRUE: the note says 'Dev will come Thursday' [1], and the realization rests on this fact. Choice B is unsupported, not contradicted: nothing says when Mrs. Abara was due back or whether she came early. The why rules both out by saying 'not on Monday', which misreads 'that day'. Direction: replace C with a choice the text contradicts, e.g. 'Dev had already fed Biscuit that morning' ([7]: Dev was watering the plants, and [1]: he comes only to water them). Replace B with one [3], [6] or [7] contradicts, e.g. 'Biscuit had been hiding from Dev, not from him' ([7]: she is on the armchair watching him while Dev is there). Facts to check: [1], [3], [7].

NOT FIXED YET

Not fixed yet: please look at it before you approve.

q3 version B, choice A ('sitting still on the floor and waiting for her to come') + why · round 3 · 🔎 Fact checker

Not fixed: for you

BEFORE · WHAT THE CHECKER CAUGHT

This wrong choice is arguably true, and the pack itself says so. Both q11 model answers say that by the end he 'lets her come to him' and 'sits quietly' (q11A, q11B), and [5]-[6] show him sitting still on the floor when she comes. The why's 'he was not waiting for her' describes his intent on Wednesday, not what he has figured out by Thursday. Direction: replace A with a choice the text contradicts, e.g. 'leaving the food bag out where she can find it' ([2], [3]: the food did not bring her close). Facts to check: [2], [3], [5], [6].

NOT FIXED YET

Not fixed yet: please look at it before you approve.

PREVIEW — not approved for use

q9 version A, choice B ('young fish stopped nibbling the roots') and choice C ('fishermen stopped trampling the shore') + why · round 3 · 🔎 Fact checker

Not fixed: for you

BEFORE · WHAT THE CHECKER CAUGHT

These choices are unsupported, not contradicted. [5] says 'The snails ate those too' but does not say only snails ate them. [7] ('Young fish hide among reed stems') does not rule out fish eating shoots, and no paragraph mentions trampling. B is the same gap as the round 2 B q8 fish choice. Direction: use choices a paragraph contradicts, e.g. 'until the storm's salt had washed out' is already used, so try 'until the drells had nested in the South Lagoon first' ([5]: two pairs moved into the platforms) or 'until the reeds were planted in winter instead of spring' (contradicted only if [3]/[5] name a season, so check first). Facts to check: [3], [5].

NOT FIXED YET

Not fixed yet: please look at it before you approve.

Left for you to decide (2)

q10 version B, accept list item 2 + answer '(or: [3])' · round 1 · 🔎 Fact checker

For you to decide

BEFORE · WHAT THE CHECKER CAUGHT

[3] ('each summer they were gone') explains why only a few reeds were left. It does not help define 'clumps'. [2] is borderline for the same reason. [1] 'grew thick' and [5] 'the last reed clumps' itself give the closer context. Teacher to decide whether [3] alone earns the evidence half.

WHY IT IS LEFT FOR YOU

Left for you to decide.

p2 [1] 'Tall tolla reeds once grew thick along both shores' · round 1 · 🔎 Fact checker

For you to decide

BEFORE · WHAT THE CHECKER CAUGHT

'once' suggests the reeds are gone from both shores, but [2] says the South Lagoon 'lost only a few'. This is a small tension, not a contradiction, and none of the keys rely on it. A possible fix: 'Tall tolla reeds grew thick along both shores.'

WHY IT IS LEFT FOR YOU

Left for you to decide.

PREVIEW — not approved for use

Looked at and kept on purpose (1)

q3 version A, choice C ('Dev has already told Mrs. Abara that she hid') + why · round 2 · 🔎 Fact checker

Looked at and kept

BEFORE · WHAT THE CHECKER CAUGHT	WHY IT WAS KEPT
This is ruled out, but the why's reason is weaker than it needs to be. Dev comes only on Thursday [1], [7], and on Thursday Biscuit is 'curled on the armchair, watching him' [7], so Dev saw no hiding to report. Optional: add the [7] armchair line to the why.	

PREVIEW — not approved for use

The checks, round by round

Each check is run by a fresh agent that didn't write the work. Early rounds catch problems; the last round of each check is what this pack passed.

🙈 Blind tester: solved the student copy with no key

Round	Agent	Matched the key	Right without the passages	Findings
1	🙈 No-passage probe (ELA)	**5 of 8**	A: 5 of 8 (failed)	3
1	🙈 No-passage probe (ELA)	**7 of 8**	B: 7 of 8 (failed)	1
2	🙈 No-passage probe (ELA)	**4 of 8**	A: 4 of 8 (failed)	0
2	🙈 No-passage probe (ELA)	**5 of 8**	B: 5 of 8 (failed)	1
3	🙈 No-passage probe (ELA)	**4 of 8**	A: 4 of 8 (failed)	0
3	🙈 No-passage probe (ELA)	**7 of 8**	B: 7 of 8 (failed)	0

Later rounds recheck only the questions that changed. Where the blind tester's answer didn't match the key, the question was looked at again (see the findings). "Right without the passages": answered from the questions alone, before reading; a reading question should need the passage, so about 40% or more right (chance is 25%) fails the round and the questions are redesigned.

🧮 Solver: worked every answer on its own

Not used for this subject.

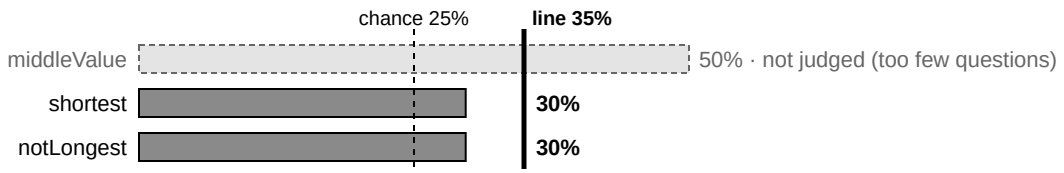

🤖 Wilco: are the keys sound, and could a student guess without knowing?

The keys check reads every question row: one right answer, keys in range, A and B testing the same skills at the same levels.

Round	Keys check	Rows	Errors	Warnings
1	**passed**	22	0	0

Each test-wise bot answers with a trick (pick the longest choice, the largest number, and so on). A bot passes when it scores no higher than the line, 10 points above chance. A bot is only judged when there are enough questions of its kind (a number bot needs 3 questions with number choices); with fewer, one question would swing it, so it is shown greyed and not judged.

Round 1: passed on 16 choice questions. Chance 25%, line 35%, highest judged bots: shortest, notLongest at 30%.

Round 1: passed on 16 choice questions. Chance 0%, line 10%.

PREVIEW — not approved for use

line 10%

0% undefined

0% undefined

Round 1: passed on 22 choice questions. Chance 0%, line 10%.

🔎 Fact checker: every claim, date, name and term

Round	Claims checked	Flagged	Notes
1	55	7	Internal-consistency check only (p2 is invented on purpose). 55 = 33 article claims in p2 ([1] 6, [2] 6, [3] 4, [4] 4, [5] 4, [6] 5, [7] 3, [8] 1) + 22 keyed items (q1-q11, versions A and B). No real place, species or event in p2 (Vessa, tolla, drell, kib, Hana Selk are all invented). No paragraph contradicts another: [3] blames salt and [4] corrects it, which is the story's point, not a clash. The timeline holds: storm 1961, Selk 1968, platforms 1971, two pairs in 1972, five summers, reeds back by 1980. p1's days hold too: Mon-Thu, Dev on Thursday. Every quotation in every why and model answer matches the passage word for word. Every key says no more than the passage, except q9B. Sweep: the q9B overclaim ('showed it was wrong', 'no sign of harm') appears only in q9B's key and why. The 'fish clean the mud' idea appears only in q8A. The [3] misreading appears only in the q4B why. No other places found.
2	74	5	Internal consistency only: p2 is invented on purpose. 74 = 15 changed items (A q2, q3, q4, q7, q8, q9; B q2, q3, q4, q5, q6, q7, q8, q9, q10), each checked for key, why quotes and every wrong choice (56 choice/accept claims + 15 keys = 71), plus p2 [1] checked against [2]-[8] (3 claims). Every why quotation matches the passage word for word. The changed p2 [1] ('grew thick along both shores') now fits [2] (South 'lost only a few') and [5] ('the last reed clumps'). Timeline unchanged and consistent: 1961, 1968, 1971, next spring, five summers, 1980; 1971-1968 = 3 years (q7B why). All 5 round 1 FIX/JUDGMENT findings are fixed (see below). Sweep for the new 'off' claims: 'the catch rose' (flat, without [7]'s 'If anything') is in q9A key D and q9A why only. Elsewhere, q8B why quotes [7] correctly, and the HANDOFF line about q9A is not student-facing. 'No one ever saw' (not 'had ever seen') is in q9B key B only; the q9B why quotes [2] correctly. The 'fish eat shoots' idea is in q8B choice B only. Round 1 findings fixed: q9B key (now 'catch held', and each wrong choice is contradicted by [2]/[4]/[5]); q3A choice B (now contradicted by [2] 'Kiran filled the bowl'); q8A choice C (replaced, and the new B/C are contradicted by [3]/[2]); q4B why (now cites [1], [2], [3], [7]); q5B accept/why (now names the two [2] lines); q10B evidence (now [1]/[2]); p2 [1] 'once' (dropped).
3	68	3	Internal consistency only: p2 is invented on purpose. Both passages are unchanged since round 2. 68 claims = the 15 changed items (A q1, q2, q3, q4, q6, q7, q8, q9; B q1, q2, q3, q4, q7, q8, q9): 15 keys, 45 wrong choices and 8 why lines. I also re-read the q5 and q10 accept lists. Every why quotation matches the passage word for word. Every key says no more than the passage, including the corrected B q9 key. The q5 and q10 accept lists name the lines that earn credit. 3 FIX: A q3 has one wrong choice that is true and one that nothing rules out. B q3 choice A matches the q11 model answers. A q9 brings back the round 2 'fish eat the shoots' gap. Sweep: 'Dev was

PREVIEW — not approved for use

			supposed to come that day' and 'came home early' appear only in A q3. The fish idea appears only in A q9 choice B (the B q8 choice is gone). 'Lets her come to him' appears in the q11 A and B model answers, which conflict with B q3 choice A. All round 2 findings are fixed (see fixed).

PREVIEW — not approved for use

What the auditor changed

After the order, the auditor reads every finding and changes the agents' briefs so the same mistake is less likely next time.

Changes to the agents' briefs

- [object Object]
- [object Object]
- [object Object]
- [object Object]
- [object Object]

Notes

- Open for the teacher: the no-passage gate FAILS for both versions after 3 rounds. A fails at 4 of 8 right without the passage; B fails at 7 of 8 (a version passes at 3 or fewer). Open FIX: A q4, A q8, B q8 can be guessed; A q9 and B q9 are labelled level 3 but take one step; B q3 has two right answers; B q6 has years out of order; B q5's action is printed in B q2 choice C; fact recheck: A q3 choice C is true by [1], B q3 choice A is arguably true, A q9 choices B and C are unsupported. No preview was sent and nothing was approved; the sample stays hidden.
- Setup: grade 7 reading quiz and rubric, 165 tokens, budget $16.50 (hard stop for this attempt $15). Two original passages: an invented article (321-322 words) and a story (350 words). Part A / Part B pairs were left out this time; wrong choices must be ruled out by a paragraph.
- Round 1: the maker wrote 8 multiple choice + 2 short citing items + a RACE response per version. All four Wilco scripts passed. The no-passage probes did not: version A got 5 of 8 (cues: type 2, item 2, sounds 1; 3 sure), version B got 7 of 8 (item 3, sounds 2, type 1, guess 1; 1 sure). Fact check: 55 claims, no contradictions, 5 FIX and 2 JUDGMENT.
- Round 1 catches: probe FIX on A q2, A q4, A q9 and B q3 (right at confidence 4 from story or article pattern). Fact FIX: key widened beyond [7] in B q9 and its wrong choice B; a wrong choice not ruled out by any paragraph (A q3); a choice unsupported rather than wrong (A q8); a why that misread who speaks in [3] (B q4); an accept list that would credit lines that do not show the action. JUDGMENT: which paragraph defines 'clumps', and whether 'once' in [1] clashes with [2].
- Round 1 fixes: all five fact FIX items were fixed in round 2 and the fact recheck confirmed it; "once" was dropped from [1].
- Round 2: the maker redid the whole version (new A q2, B q2, B q3, B q6, B q7, B q9 and others). Probes: A 4 of 8 (sounds 2, item 1, topic 1; none sure), B 5 of 8 (item 2, topic 2, sounds 1; 1 sure); both FAIL. B q5's short answer came close to full credit from B q3 choice C (the food bag). Probe FIX: B q9. Fact recheck: 74 claims, 4 FIX (key said the catch rose when [7] hedges; two choices unsupported; a 'no one ever saw' stretch) and 1 KEEP.
- Round 3 (last): the maker fixed the whole version again. Final whole-version probes: A 4 of 8 (item 2, sounds 1, topic 1; none sure), B 7 of 8 (item 3, type 2, topic 1, sounds 1; none sure); both FAIL. No short answer scored over half credit. Fact recheck: 3 FIX (named above). The round 3 fixes were not rechecked: the order stopped here.
- Passage-free results by round (matched of 8, gate fails at 4 or more): round 1 A 5, B 7; round 2 A 4, B 5; round 3 A 4, B 7. A fell from 5 to 4 and stayed at the line. B fell to 5 in round 2 and went back to 7 in round 3.

PREVIEW — not approved for use

- Keyless blind solve (round 3): 16 of 16 multiple choice keys matched and short answers matched in substance. 8 FIX (A q4, A q8, B q8 guessable; A q9 and B q9 mislabelled level 3; B q3 two right answers; B q6 years out of order; B q5's action printed in B q2 choice C), 3 JUDGMENT, 2 KEEP.
- Wilco: round 1 is the only run in the pack, and all four scripts passed. Keys: 22 rows, 0 errors. Test-wise bots over 16 questions: worst middleValue 50% (chance 25%), shortest and notLongest 29.7%; the group gates passed. No-passage bots: worst echo 29.2%. Cross-item: 0 hits. Later Wilco runs and 'after' scores are not in the pack. The cross-item script found 0 hits in every round while the probes found 2 to 3 item cues each, so the leaks are in meaning, not in wording the scripts can see.
- Onboarding and follow-up: not in this hand-off, so no row for the onboarding agent, its warnings, questions or the teacher's answer. Not measured.
- Preview and approval: none. No preview was sent, the teacher asked for no changes and there is no approval (so no 'final' section).
- Time: 38.9 agent minutes from the sessions' own records (round 1 14.1, round 2 11.4, round 3 13.4). Wall-clock time cannot be given: the hand-off has no start and end times, and the lead's steps are not measured. Makers 27.3 minutes of the total, checkers and probes 11.6.
- Cost: $11.84 exact, from the sessions' own dollars (round 1 $4.10, round 2 $3.27, round 3 $4.47). Tokens: 10,591,350 reported (round 1 3,868,528, round 2 2,397,918, round 3 4,324,904); these understate billed use when a session re-reads its context, so dollars are the figure to use. Running total after each round: $4.10, $7.37, $11.84. That is 72% of the $16.50 budget and 79% of the $15 hard stop, so never near 2× the budget and no cost stop. Lead's steps not measured. Per keyed item: $11.84 over 22 is about $0.54 (estimated; the record has no per-document split).
- Result: three rounds of whole-version fixes did not close the gate. Each round fixed what the probes and checkers named, and new cues showed up in other items.

Preview: not approved yet. Nothing is released until the teacher signs off in REVIEW.html.

Made with AI. Check it before students see it.
Made with AI from the source material you provided, then checked by separate AI agents. Please review everything before it goes in front of students.

Your uploads and our working copies are deleted after you receive your pack. Your style examples are kept only for your own agents, and you can delete them at any time. Nothing you send is used for anyone else.
